AMC: typical service scope

Periodic inspection • Functional checks • Preventive servicing • Fault identification • Service records. Visit frequency, refilling, spares and corrective support are agreed in the contract.

Working with your organisation

A practical approach for new projects, upgrades, equipment procurement and ongoing maintenance.

Industries we serve

Commercial buildings • Warehouses • Residential homes and societies • Corporate offices • Industries and factories • Hospitals • Hotels • Schools and colleges

Collaboration opportunities

Builders & developers

Fire protection packages for new construction and refurbishment.

Facility & property managers

Periodic servicing, system upgrades and AMC arrangements.

Corporate procurement & industrial teams

Equipment supply and project-specific installation requirements.

MEP contractors & consultants

Coordination of agreed fire protection packages and site interfaces.

Project delivery approach

Understand site requirements → Agree technical and commercial scope → Supply and install → Conduct agreed checks and handover → Maintain under agreed service terms.

Equipment selection and installation requirements are subject to site assessment, applicable standards and agreed specifications. Statutory approvals and certifications are not implied.

Our commitment

Safety-focused decisions, clear communication, quality workmanship and dependable service are the principles guiding our proposed customer engagement.
